PROFESSIONAL SUMMARY

Python Developer with 3+ years of experience building scalable backend systems, microservices, and fullstack web applications. Expert in FastAPI, Flask, Django, event-driven architectures (Kafka, Airflow) and cloud platforms (AWS, Azure), consistently delivering high-throughput services and reducing latency.

SKILLS

Languages: Python, JavaScript, TypeScript, SQL

Backend: FastAPI, Flask, Django, Django REST Framework, SQLAlchemy, Asyncpg

Frontend: React.js, Next.js, Tailwind CSS

Databases: PostgreSQL, Redis, MongoDB

Messaging & Orchestration: Apache Kafka, Apache Airflow, Celery

Cloud & DevOps: AWS, Azure, Docker, Kubernetes, Nginx, Terraform, GitHub Actions

Authentication & Security: Keycloak, JWT, OAuth2, OIDC

Monitoring & Tools: Grafana, Prometheus, Loki, Git, Linux

EXPERIENCE

Software Developer

May 2025 – Present

63 Moons Technologies · Full Time

- Developed event-driven microservices using FastAPI, PostgreSQL, Kafka, and Docker for subscription management, notification delivery, and user onboarding workflows.
- Built a multi-channel notification platform supporting email, WhatsApp, and push notifications with at-least-once delivery guarantees, encrypted data handling, and structured logging.
- Designed and deployed a judicial data pipeline using Airflow, Kafka, Redis, and PostgreSQL to ingest and synchronize over 100k Indian court records.
- Engineered a real-time Contract Lifecycle Management platform using FastAPI, WebSockets, Yjs CRDT, Keycloak, and Redis, enabling collaborative document editing and workflow automation.

Jr. Python Developer

Jul 2024 – Apr 2025

Psych X86 Technologies · Full Time

- Developed and optimized backend services using Flask, FastAPI, PostgreSQL, Kafka, and Airflow, improving data processing performance by up to 40%.
- Designed and built a BPMN-based Journey Builder microservice platform enabling scalable real-time workflow execution and monitoring.
- Developed REST APIs integrating payment gateways, CRM systems, and administrative workflows.
- Implemented Docker-based deployments, CI/CD automation, and process supervision using SupervisorD, improving deployment reliability and operational efficiency.

Full Stack Python Developer

Jun 2022 – Jul 2024

PCE / Maharashtra Police · Freelance

- Delivered three fullstack applications using Flask, Material Dashboard, SQLAlchemy and WTForms, achieving high-availability production deployments.

- Optimized database queries and application logic, reducing response times by 25%.
- Managed production servers with proactive monitoring, maintaining >99.5% uptime across all client portals.

Cloud/DevOps Architect

Dec 2023 – Mar 2024

TCIA Global Pvt. Ltd. • Intern

- Automated Azure environment provisioning with ARM templates and Azure CLI, reducing VM setup time by 70%.
- Contributed to a Flaskbased fullstack web app, integrating CI pipelines and containerization.

PROJECTS

QiWatch - Subscription & Notification Services

FastAPI • PostgreSQL • SQLAlchemy • Kafka • Docker • Python • FCM • Airflow • k8s

- Built subscription and notification microservices that manage Razorpay, Google Play, and Apple App Store subscription lifecycles while orchestrating email, WhatsApp, push, and in-app notifications.
- Implemented layered architecture and idempotent webhook processing to ensure reliable handling of subscription events across multiple payment providers.
- Developed background reconciliation workers and Kafka-driven workflows for subscription state synchronization and event propagation.
- Created a multi-channel notification engine supporting email, WhatsApp, push, and in-app notifications with at-least-once delivery guarantees.

QiLegal - Judicial Data Platform

qilegal.com/

FastAPI • Celery • Redis • Kafka • Airflow • PostgreSQL • Python • Docker • AWS Load Balancers

- Implemented a distributed data ingestion platform that aggregates and synchronizes Indian court data from multiple judicial websites using FastAPI, Celery, Redis, Airflow, Kafka, and PostgreSQL.
- Engineered scalable scraping and import workflows with Celery and Redis, enabling parallel processing of large judicial datasets.
- Implemented Kafka-based retry mechanisms for fault-tolerant data synchronization.
- Developed Airflow DAGs to orchestrate periodic data extraction, transformation, and loading pipelines processing over 100k court records.

Advantus - Marketing Automation Platform

advantus.io/

FlaskRESTful • PostgreSQL • Kafka • Airflow • Docker • Airflow • Asyncpg • Python

- Contributed to a large-scale marketing automation platform by developing and optimizing audience management, campaign orchestration, and workflow execution services.
- Designed and implemented a BPMN-based Journey Builder microservice using FastAPI, asyncpg, Kafka, and PostgreSQL LISTEN/NOTIFY, enabling real-time workflow execution and visual campaign automation.
- Optimized audience verification and ingestion pipelines through PostgreSQL COPY operations, materialized views, and strategic indexing, reducing data processing time by 40%.
- Reduced Docker image size and build times, accelerating CI/CD pipelines.

EDUCATION

Bachelor of Technology (B.Tech.) – Information Technology

2020 – 2024 | CGPA: 8.9/10

University of Mumbai

Major: Cloud Computing, Cyber Security, AI/ML | Minor: Blockchain
